Instructions:

1. Fixture comes complete and must first be disassembled to install. Start by removing the faceplate (Cage) and jelly jar by unscrewing; be certain not to lose the gasket in the fixture. Set items aside.
 2. Remove the three screws that hold the wall mounting bracket and the spinning canopy together.
 3. Bring the supply wires from the fixture to the J-Box and do the necessary wiring.
 4. Mount the wall-mounting bracket to the electrical supply box (J-box) using holes provided.
- Note:** The outer edge of the fixture that comes in contact with the mounting surface must be silicone caulked by the installer. This is critical for a safe and reliable installation.
5. Attach the rest of the fixture by assembling the fixture assembly backplate to the wall-mounting bracket.
 6. Lamp the fixture according to label requirements. (Lamps provided by others).
 7. Replace the jelly jar, gasket and the faceplate (cage).

GENERAL

1. Before starting the installation, disconnect the power by turning of the circuit breaker or by removing the fuse at the fuse box. Turning the power off at the light switch is not sufficient to prevent electrical shock.
2. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning.
3. All electrical connections must be in accordance with local codes, ordinances, or the national electrical code.
4. These fixtures are intended to be mounted to a 4" x 2-1/8" deep metal octagon outlet box. The box must be directly supported by the building structure.

Note: The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur.
