**Instructions:**

1. Fixture safety is warranted only by proper use of the following instructions: please save them.
2. Make power supply connections to fixture.
3. Mount the fixture directly to the wall with four holes provided, using four lag bolts (provided by others) got secure mounting. **Note:** The outer edge of the fixture that comes in contact with the mounting surface must be silicone caulked by the installer. This is critical for a safe and reliable installation.
4. Loosen and remove screws holding lens door to fixture. Fifth screw should be loosen only enough to wing lens door out of the way for lamp installation, retightening this screw to hold lens door in place.
5. Lamp per label requirements. (Lamps are not included)
6. Once lamps are installed loosen screw reposition lens door and replace other four screws, securing lens door in closed position.

**GENERAL**

1. Before starting the installation, disconnect the power by turning of the circuit breaker or by removing the fuse at the fuse box. Turning the power off at the light switch is not sufficient to prevent electrical shock.
2. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning.
3. All electrical connections must be in accordance with local codes, ordinances, or the national electrical code.

**Note:** The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur.
