**Note:** Before connecting the fixture to power supply, be sure that the power is switched off.

**Instructions:**

1. Detach the component tray from the housing by unscrewing the six counter sunk setscrews.
2. Remove the component tray and keep the counter sunk set screws aside.
3. Install the required lamp in the fixture. (The socket configuration may differ depending upon the lamp choice).
4. Replace the component tray back in its place.
5. Make the electrical connections.
6. For concrete installation. Install three inserts in concrete (provided by others) at proper location in the mounting surface.
7. Mount the fixture to the inserts with fasteners (provided by others).

**GENERAL**

1. Before starting the installation, disconnect the power by turning off the circuit breaker or by removing the fuse at the fuse box. Turning the power off at the light switch is not sufficient to prevent electrical shock.

2. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning.
3. All electrical connections must be in accordance with local codes, ordinances, or the national electrical code.

**Note:** The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur.

**Mounting Plate Detail**

**Relamping:**

Remove 1/4 - 20 fasteners, set aside. Flip fixture over and remove component tray (6 screws). Replace lamp per designation on label. Replace component tray (6 screws). Flip fixture back to upright position and secure fixture back in place 1/4-20 fasteners that were set aside.
