1. Turn off electrical power before installing or maintaining any part of the fixture.
2. Remove the (4) four socket head screws holding the lens and face from fixture.
3. Remove aluminum ballast cover, which is held in place by four screws.
4. Pour concrete flush with front edge of fixture.
5. When mounting for concrete pour, be sure to level and stabilize fixture. If provided back boxes less electrical assembly be sure to cover the holes on back of fixture housing to prevent concrete from filling.
6. Connect conduit or code approved electrical fitting through 7/8" diameter hole on back of fixture.
7. After fixture is mounted, connect your ground wire to provided green ground wire on fixture.
8. Replace aluminum ballast cover and secure to ballast tray.
9. Install correct lamp as per label.
10. During final assembly of lens and frame to the fixture housing, start the four (4) socket head screws and tighten evenly.
11. Restore power and test fixture. If fixture does not turn on, disconnect power before checking for problem.

Note: Fixtures are listed for installation with liquid tight or rigid wall conduit only.

GENERAL

1. Before starting the installation, disconnect the power by turning of the circuit breaker or by removing the fuse at the fuse box. Turning the power off at the light switch is not sufficient to prevent electrical shock.
 2. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning.
 3. All electrical connections must be in accordance with local codes, ordinances, or the national electrical code.
- Note:** The important safeguards and instructions appearing in this sheet are not meant to cover all possible conditions and situations that may occur.

Further instructions on back of sheet.
