DETAILED ILLUSTRATION

GENERAL:

1. Before starting the installation, make sure all electricity has been turned off and electrical breaker has been locked out and tagged out.
2. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning.
3. All electrical connections must be in accordance with local codes, ordinances, or the National Electrical Code.
4. These fixtures are intended to be mounted directly to the building structure, installed over a J-Box or conduit outing.

NOTE: The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur.

INSTALLATION

1. Loosen hex head screws to remove Faceplate Lens and Gasket.
 2. Remove screws securing lamping component tray (guts) from Fixture Housing to access mounting holes inside Fixture Housing.
 3. Pass wiring from fixture through Housing and make code approved wiring connections at J-Box.
 4. Secure Fixture Housing to J-Box, ensuring that fixture is level then tighten screws.
- NOTE:** Ensure that Fixture is level before finally tightening. You can add additional anchors to back of Fixture Housing if desired.
5. Replace component tray into Housing. If not LED, install correct lamp per label.
 6. Replace Gasket, Lens & Faceplate, taking care to evenly tighten screws to create a proper moisture seal.
 7. Installer **MUST** add a bead of silicone where edge of Fixture meets the Mounting Surface to avoid water seepage.
